

For the tasks I completed last week. I finally finished the pipes textures. It took a lot of work to satisfy David. I think from when I started working on them till now it took a few weeks and at least 4 different adjustments to the pipes but I'm glad they are finished. They then gave me the store set to make props for. I made a list of potential items to make on Thursday and they chose a few for me to put together. So i started on making different bottles
